
CASE STUDY:

Target for drug action (transport protein)

Prepare an infographic poster for any one of the options listed in the table shown below:

OPTION	A	B	C	D
Condition/disease	Obesity	Peptic ulcer	Retinal vein occlusion	Diabetic neuropathy
Drug	Sibutramine	Omeprazole	Heparin	Bevacizumab

The poster must have the following information:

- a) Prevalence in Malaysia and worldwide
- b) Pathophysiology of the disease
- c) Drugs mechanism of action (please highlight on the transport protein involved)
- d) Side effects and any possible interactions (please relate on ocular pharmacology for OPTION A and B)
- e) Include suffice information on drug-drug and food-drug interaction related to the drug of interest

Marks will be given on the creativity, information, organization and originality
